EXECUTIVE SUMMARY

Entry-Level Java Full Stack Developer with hands-on experience in Java, Spring Boot, Spring Security, REST APIs, Microservices, GraphQL, Apache Kafka, Redis, gRPC, Docker, PostgreSQL, and React. Experienced in developing scalable microservices using Spring Cloud (Eureka, API Gateway) and implementing JWT-based authentication. Completed industry training at Revature and Capgemini, along with two internships and full-stack projects demonstrating end-to-end application development.

SKILLS

- Programming: Java, JavaScript
- Backend Technologies: Spring Boot, Spring Security, Spring Data JPA, REST APIs, Microservices
- API & Communication: GraphQL, gRPC
- Messaging & Caching: Apache Kafka, Redis
- Frontend Technologies: React
- Database: PostgreSQL
- DevOps & Tools: Docker, Nginx, Git, GitHub, Maven, Postman, Linux (CLI)

PROJECTS

- 1. Hospital Management System (Microservices Architecture)** [Link](#) June 2026
 - Designed and developed scalable **microservices architecture** with independent Authentication, Patient, and Doctor management services using Spring Cloud (Eureka, Gateway)
 - Implemented secure **API Gateway** with **JWT-based authentication** and **role-based authorization** (ADMIN, DOCTOR, PATIENT) for protected inter-service communication
 - Integrated **Apache Kafka** and **gRPC** for asynchronous messaging and high-performance inter-service communication.
 - Developed **GraphQL APIs** and integrated **Redis** caching to improve data retrieval efficiency and application performance.
 - Containerized services with **Docker**, configured **Nginx** as a reverse proxy, and optimized **PostgreSQL** databases for reliable deployment and data isolation.
- 2. Student Management System :** [Link](#) Nov 2025
 - Developed full-stack application using Spring Boot REST APIs and React frontend with seamless CRUD operations connected to PostgreSQL database, ensuring reliable data storage and retrieval
 - Containerized application with **Docker** for consistent deployment across environments and integrated **gRPC** services for efficient inter-service communication, reducing API latency and improving system performance
 - Built responsive **React** UI components with real-time data binding and robust error handling for intuitive student record management

INTERNSHIPS

- 1. Wentrte Technologies Pvt. Ltd. – Java Full Stack Developer Intern** July 2026 – Present
 - Developing scalable Spring Boot microservices using GraphQL, Apache Kafka, Redis, gRPC, Docker, Nginx, PostgreSQL, and Spring Security for distributed application development.
- 2. Simplzone – Frontend Web Development** Jun 2024 – Jul 2024
 - Worked on building responsive web interfaces using HTML, CSS, and JavaScript.

EDUCATION

Bachelor of Computer Science & Engineering
CGPA: 8
I.F.E.T College of Engineering , Villupuram - Tamil Nadu

Nov 2022 - June 2026

CERTIFICATIONS & ACHIEVEMENTS

- Successfully completed Java Full Stack Development training at Revature, developing skills in building end-to-end web applications using modern technologies.
- Completed Java Full Stack Development training at Capgemini through TNS India Foundation. Gained hands-on experience in full-cycle application development across backend, frontend, and database layers.
- Solved 50+ coding problems on LeetCode and GeeksforGeeks Platform.
