EXECUTIVE SUMMARY

Motivated AI/ML and Python Developer with hands-on experience in machine learning, deep learning, automation, and backend application development. Proficient in Python, TensorFlow, Pandas, NumPy, REST APIs, Git, and software development fundamentals. Experienced in building end-to-end AI solutions, data processing pipelines, and intelligent applications through academic projects and internships. Passionate about solving real-world problems using AI, automation, and scalable software development.

SKILLS

- Programming: Python
- Machine Learning: scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, Feature Engineering, Model Evaluation, Supervised & Unsupervised Learning
- Deep Learning: TensorFlow, Keras, CNN, Data Augmentation, Transfer Learning
- Computer Vision: OpenCV, Image Preprocessing, Object Detection
- Data Processing: Data Preprocessing, Exploratory Data Analysis (EDA), End-to-End ML Pipelines
- Software Development: Object-Oriented Programming (OOP), REST APIs, Git, GitHub, SDLC
- Databases: SQL, PostgreSQL
- Network & Security ML: Scapy, Packet Analysis, Anomaly Detection
- Deployment & Visualization: Streamlit, Data Visualization

PROJECTS

1. **Smart AI-Based Network Intrusion Detection System** [Link](#) Aug 2025
 - Captured and preprocessed real-time network packets using Scapy and built a CNN model with TensorFlow/Keras, achieving 90%+ intrusion detection accuracy.
 - Performed data preprocessing, feature engineering, and model evaluation to improve detection performance and reduce false positives by 30%.
 - Deployed the application using Streamlit with Git-based version control for real-time network traffic analysis and threat classification.
2. **RiceGuard – Crop Disease Detection System** [Link](#) Jan 2026
 - Developed a CNN-based crop disease detection system using OpenCV and TensorFlow, trained on a 12 GB rice leaf dataset with data augmentation, achieving 92% accuracy.
 - Performed image preprocessing, model training, and evaluation for multi-class disease classification.
 - Deployed the application using Streamlit for real-time disease prediction.

INTERNSHIPS

1. **Simplzone – Test Engineer** Jan 2025
 - Developed and executed automated test scripts using Python and Selenium, improving test coverage and reducing manual testing effort.
 - Collaborated with the development team to identify, debug, and report software defects using Git-based workflows.

ACHIEVEMENTS

- Earned certification in Python Essentials 1 & 2 by Cisco Networking Academy, demonstrating proficiency in Python fundamentals, OOP principles, and practical problem-solving techniques.
- Solved 50+ coding problems on LeetCode.
- Developed and maintained ML projects on GitHub with version control, ensuring reproducibility and collaborative development standards.

EDUCATION

Bachelor of Computer Science & Engineering

Nov 2022 - 2026

I.F.E.T College of Engineering, Villupuram - Tamil Nadu

CGPA : 8.0
